ARMLESS BOY TAKES TRAIN

KANSAS CITY, Kan. (AP) -

"Runaway in the yards!" That electrifying warning crackled over the network of the vast Santa Fe switchyards Monday evening.

A spare switch engine. No. 552 had rumbled out of the yards onto the Santa Fe's main westbound line and was headed toward Union Station in Kansas City, Mo.

at 35 miles an hour. The yardmen didn't know it but Larry Jones, 12, was in the cab of that engine.

BORN WITHOUT ARMS

He had his feet on the controls-because he has no hands. He was born without arms.

The boy climbed aboard the idling engine in the gathering dusk, put one foot on the brake, one on the throttle and took off on a six-mile ride.

The first alarm came, said L. C. when "the yardmaster at the east OPEN end called and wanted to know what that engine was doing, running through all those red signals. WANTED TO GO

"I just wanted to keep going and going," said Larry.

With his toes, he tried to turn on the headlight, but couldn't. The control towers switched him off the main line onto a complex of switch tracks. Suddenly Larry saw a boxcar ahead.

Expertly, he eased old 552 to a halt, backed off a ways, then decided to hook onto the boxcar. Just then, however, a pursuing engine caught up. Switchman Gene Schieble jumped onto 552 slammed the emergency brake
